Your compass for long-term success

BUSINESS LAW

We partner with clients to achieve their goals

SATC|Law's business lawyers partner with individuals, entrepreneurs and privately held companies to offer sophisticated legal advice on starting, growing, managing, and protecting their businesses.

We are proud of the long-term relationships we have with our clients. By engaging with our client's business, we can advise how to move the ball forward not only when seizing opportunities but also when navigating roadblocks.

Where most law firms simply provide counsel, we go further by helping clients effectuate our advice, walking step-by-step along the course we chart together.

We bring a value-based approach to businesses at all stages and across a variety of industries. We go beyond strategic legal advice to serve as an advocate, a resource and a fresh set of eyes for all our client's business needs.

Business planning and formation

We advise start-ups, entrepreneurs and nonprofit companies – from professional services, to manufacturing, to artists – on how to launch, seed and grow their businesses. We regularly help businesses articulate how they want to be viewed in the marketplace and then develop a plan to achieve their vision. We also develop the policies and processes to improve efficiencies and achieve compliance, as well as guide businesses through formulating and achieving long-term goals.

Operational issues

Clients trust our ability to provide practical, sound guidance whether they are expanding into a new

service line or geography or need to navigate an audit, subpoena or other issue. For many clients, we serve as an outsourced General Counsel, providing guidance on both day-to-day issues – such as vendor contracts and employee matters – and big-picture ones – such as strategic growth and succession planning.

Data management and cybersecurity

We understand that data management and cybersecurity issues belong in the boardroom, not just the IT department. We take preventative measures, helping clients create best-in-class training and policies to manage and safeguard their data. We are proud of our involvement with many of the organizations that are shaping this fast-evolving industry.

Business transactions

We pride ourselves on providing value-adds for our client's organizational issues. We counsel on ownership and management agreements, taxation, acquisition of real property, leasing and employment agreements such as restrictive covenants, as well as vendor agreements. We also regularly counsel clients through partner disputes.

Business litigation

When adversarial issues arise, we counsel our client on how to best get back to running the business. Whether counseling on an ownership or employment dispute or another matter, we focus on solving the problem. In instances where litigation is in the client's best interest, we are trial-ready and fierce advocates in the courtroom.

COMMERCIAL REAL ESTATE

We handle the most complex and sophisticated real estate matters

SATC|Law has one of the most sophisticated and experienced commercial real estate practices in the country. Our depth rivals that of many national law firms' commercial real estate practices, which often count lawyers who only dabble in this area.

Our attorneys regularly represent real property owners and institutional owners, as well as other entities with complex real estate needs. Many of our attorneys are licensed managing real estate brokers, as well as members of the International Council of Shopping Centers (ICSC) and the American Institute of Architects (AIA), which gives us a unique perspective on the intersection of business and legal counsel.

We are proud to count many clients who use SATC|Law as their single source for the entire life cycle of their projects – from acquisition to entitlement through construction and disposition – and then call on us to do it again when the time comes for redevelopment.

SATC|Law attorneys are true thought leaders in the field and are frequently invited to speak at industry conferences and private events.

Acquisition and sale

We routinely represent clients in the acquisition or sale of properties, helping them seize opportunities for future growth. We negotiate terms to add the most long-term value, while helping clients skillfully navigate contracts and other complex financing documents.

Development

We partner with developers throughout the entire development process. In addition to counseling on land use and zoning, we often serve as a bridge between owners, lenders, joint venture partners, developers, contractors, architects and others. Our extensive experience and relationships facilitate securing loans from financial institutions and foreign investors, as well as from nontraditional lenders. We are also experienced in the formation of complex joint ventures and other entities.

Leasing

Our attorneys have broad experience representing local and national landlords and tenants in retail, industrial, office and mixed-use properties.

Property management

We counsel property managers and owners on the day-to-day operational issues of running commercial properties, and counsel asset managers on how to extract the most value from their properties.

Licensing and regulatory issues

Our commercial real estate attorneys help companies and individuals obtain and maintain required licensing, including representing professionals before the Illinois Department of Financial and Professional Regulation.
